8. FAQs

1. B.Tech Computer Science Engineering (CSE)

1.1 Programme Overview

The B.Tech CSE programme is a 4-year, 8-semester degree programme with 160 credits. The curriculum is designed by an Academic Advisory Board comprising faculty from IIT, industry leaders from Google, Microsoft, and Amazon, and AICTE-nominated members.

The programme emphasises: strong foundations in algorithms and systems, project-based learning from semester 2, mandatory industry internship, and specialisation electives in AI/ML, cybersecurity, cloud computing, and full-stack development.

1.2 Semester-Wise Credit Distribution

Semester	Theory Courses	Lab	Credits	Key Subjects
I	4	2	22	Mathematics I, Programming in C, Digital Logic, Physics
II	4	2	22	Mathematics II, Data Structures, OOP in C++, Basic Electronics
III	4	2	22	Algorithms, DBMS, Computer Organisation, Discrete Maths
IV	4	2	22	OS, Computer Networks, Software Engineering, Probability
V	3+2E	2	22	Compiler Design, ML Basics, Web Dev, Elective I & II
VI	2+3E	2	22	Cloud Computing, Big Data, Elective III, IV, V
VII	1+3E	Project	20	Internship (8 weeks), Elective VI, Project Phase I
VIII	–	Project	8	Project Phase II, Seminar, Viva

2. B.Tech CSE (Artificial Intelligence & Data Science)

2.1 Programme Overview

AI&DS; is a specialised B.Tech programme launched in 2023, designed in collaboration with NVIDIA, Intel, and the IIIT Hyderabad AI Lab. The curriculum focuses on machine learning, deep learning, NLP, computer vision, and big data analytics.

Semester	Key Focus Areas	Notable Courses
I-II	Foundations	Linear Algebra, Statistics, Python for AI, Introduction to ML
III-IV	Core ML	Supervised/Unsupervised Learning, Neural Networks, Feature Engineering
V-VI	Deep Learning	CNNs, RNNs, Transformers, NLP, Computer Vision
VII-VIII	Applied AI	MLOps, LLMs, Generative AI, Capstone Project

3. B.Tech Electronics & Communication Engineering (ECE)

3.1 Programme Overview

The ECE programme covers analog and digital electronics, VLSI design, signal processing, embedded systems, communication systems, and IoT. Students have access to the Nexora Embedded Systems Lab and the RF Communications Lab.

Year	Key Subjects	Labs
1st Year	Engineering Maths, Basic Electronics, Circuit Theory	Basic Electronics Lab, Programming Lab
2nd Year	Analog/Digital Electronics, Signals & Systems, Microprocessors	Analog Circuits Lab, Digital Lab
3rd Year	VLSI Design, Communication Systems, Embedded Systems	VLSI Lab, DSP Lab, Embedded Lab
4th Year	5G/IoT, Advanced DSP, Electives, Capstone Project	Research Lab, Project Lab

4. MBA Programme Overview

4.1 MBA Specialisations

The MBA programme at Nexora Business School offers 4 dual specialisations. Students choose 2 specialisations in Semester 3 based on merit and interest.

Specialisation	Core Areas	Industry Partners	Avg Placement CTC
Finance & Banking	Investment, Risk, Corporate Finance	ICICI, HDFC, Kotak	■12.5 LPA
Marketing & Brand	Digital Marketing, Consumer Behaviour, Analytics	HUL, ITC, Zomato	■10.8 LPA
Operations & SCM	Supply Chain, Lean, ERP, Logistics	Amazon, DHL, TCS	■11.2 LPA
Human Resources	Talent Management, OB, Labour Laws, HRTech	Deloitte, ADP, SAP	■10.5 LPA
Business Analytics	Data Analysis, Tableau, Python, Business Intelligence	TCS, Mu Sigma	■14.0 LPA

4.2 MBA Programme Structure

Semester 1-2: Core management courses (Marketing, Finance, HR, Operations, Statistics, IT). Semester 3-4: Specialisation courses + industry projects + live consulting assignments. Summer Internship: Between Semester 2 and 3 (8-10 weeks, mandatory).

5. Available Elective Catalogue

Elective Course	Programme	Credits	Prerequisites
Deep Learning & Neural Networks	B.Tech CSE/AI&DS;	3	Machine Learning
Cybersecurity & Ethical Hacking	B.Tech CSE	3	Computer Networks, OS
Cloud Architecture (AWS/Azure)	B.Tech CSE	3	Networking Basics
Blockchain Technology	B.Tech CSE/MBA	3	Distributed Systems
Natural Language Processing	B.Tech AI&DS;	3	ML, Python
IoT & Smart Systems	B.Tech ECE/CSE	3	Embedded Systems
Quantum Computing Basics	B.Tech CSE (Optional)	2	Linear Algebra, Algorithms
Business Analytics with Python	MBA	3	Statistics, Python Basics
Competitive Programming	B.Tech CSE	2	Algorithms (Grade B+)
Research Methodology & Writing	All PG	2	None

6. FAQs – Courses & Curriculum

Frequently Asked Questions (FAQ)

Q: Can I take electives from other departments?

A: Yes. Inter-departmental electives are permitted for up to 2 elective slots per semester, subject to seat availability and HOD approval. Cross-department electives carry the same credits.

Q: Is there an honours programme?

A: Yes. Students with CGPA ≥ 8.0 may opt for an Honours programme by completing 20 additional credits in advanced electives and an independent research project. The degree will carry a 'with Honours' distinction.

Q: When is the specialisation selection for MBA?

A: MBA students choose specialisations during an Elective Declaration process conducted in the 3rd week of Semester 2. Career counselling sessions are arranged prior to selection.
